## ACKNOWLEDGEMENTS

I would like to acknowledge with deep gratitude the time and patience given to me by the informants I interviewed in the Pacific islands for the purposes of this study. They took me with generosity into their houses, offices and even boats and provided enormous amounts of information and insightful comments on the subject of the regulation of knowledge in the region, only a small fraction of which is able to be captured in this book. I also thank Professor Peter Drahos who has been an extremely generous source of commentary on my work, and also a source of intellectual inspiration. I would also like to thank Professor Paul Berman for first sparking my interest in critical intellectual property. I am grateful to the Australian Research Council for funding this project through a three-year Discovery Grant. I am also enormously thankful to my husband and my children for their support throughout the project, including Saskia who was born in the middle of it.

Miranda Forsyth  
Canberra, April 2015

I would like to acknowledge the support and funding of Northumbria University which enabled me to attend conferences in the UK and abroad (Bergen, Cape Town and Canberra) to present papers that contributed to this project and the Centre for Pacific Studies at St Andrews University, which allowed me to moot the idea of this publication at their annual North-North conference with Bergen University in 2012.

Sue Farran  
Newcastle upon Tyne, April 2015

The authors would also like to thank Ann-Christin Maak-Scherpe and the team at Intersentia for their support and enthusiasm for this publication and Phillip McArthur of Brigham Young University in Hawai'i who facilitated the publication of a collection of papers linked to this project, many of which are referenced in the text, in the *Pacific Studies* journal.
