

De tafels van vermenigvuldiging

Dit oefenboek is van:

☆ ☆ Aan de ouders ☆ ☆

In het tweede leerjaar/groep 4 leert uw kind een nieuwe vaardigheid: de tafels van vermenigvuldiging en deling. Om de tafels goed onder de knie te krijgen is regelmatig oefenen belangrijk – ook thuis. Alle oefeningen zijn toegespitst op het leren vermenigvuldigen en delen, maar een aantal gaan verder dan dat. Zo moet uw kind bijvoorbeeld ook logisch nadenken en eenvoudige rekenraadsels oplossen.

We beginnen met de tafel van 1! Verbind elke oefening met de juiste oplossing!

Kleur steeds de wolk waarop de juiste uitkomst staat.

Los jij de oefeningen op? Vermenigvuldigen en delen door elkaar!
