LIST OF AUTHORS	ix
LIST OF ABBREVIATIONS	xi

PART I. COMPETITION LAW AND THE ENERGY SECTOR 1

1. INTRODUCTION	
ULF HAMMER	3

2. THE NEW FRAMEWORK FOR GAS TRANSPORTATION IN NORWAY	
ARE L. BRAUTASET	5

1.	Introduction	5
2.	Gassco	6
3.	Implementation of the Gas Market Directive in Norwegian Law	7
4.	Gassled	9
4.1.	The Establishment of Gassled	9
4.2.	The Gassled Transportation System	10
4.3.	Gassled Services	11
5.	The New Regulatory Framework – Overview and Hierarchy	12
6.	The Petroleum Regulations Chapter 9: Access to Upstream Pipeline Networks – Overview	13
7.	General Requirements for Access to the Transportation System	14
7.1.	Introduction	14
7.2.	Natural Gas Undertaking or Eligible Customer	15
7.3.	Duly Substantiated Reasonable Need for Transportation ..	15
7.4.	Compatibility with the Technical Requirements	16
8.	Additional Requirements for Access	17
9.	Capacity Markets	18
9.1.	Primary Market	18
9.1.1.	Reservation of Capacity in the Primary Market	18
9.1.2.	Allocation of Scarce Capacity in the Primary Market	20
9.1.3.	Tariffs in the Primary Market	21

9.2.	The Secondary Market	22
9.3.	Right of Access to Unused Booked Capacity	23
10.	Disputes Relating to Access	24
11.	Intervention by the Ministry	25
12.	Conclusion	26

3. MERGERS IN THE ELECTRICITY SECTOR – RELEVANT MARKETS AND RELATED ISSUES

LEIGH HANCHER AND ROLAND DE VLAM		29
1.	Introduction	29
2.	The EC Legislative Framework for Electricity	30
2.1.	The Electricity Directive	30
2.2.	The New Directive 2003/54	32
2.2.1.	Introduction	32
2.2.2.	Competition in Production and Supply	33
2.2.3.	Unbundling	34
2.2.4.	Regulators and Regulatory Functions	35
2.2.5.	Access and Regulation	35
2.3.	The Regulation on Cross-Border Electricity Exchange . . .	36
3.	Specific Problems of Applying Competition Rules in the Electricity Sector	37
3.1.	Dominance and Impeding Competition	37
3.2.	Relevant Markets	39
3.2.1.	Product Markets	39
3.2.2.	Other Factors	41
3.2.3.	Geographic Markets	43
4.	Compatibility Issues	45
4.1.	Market Share and Market Power	45
4.1.1.	Introduction	45
4.1.2.	Horizontal and Vertical Integration	46
4.1.3.	National Interests and National Regulation	47
4.2.	Limited Scope for Restructuring	50
5.	The Limited Scope of Merger Control	50
6.	A Short Overview of EC Electricity Merger Decisions and Related Remedies	51
6.1.	Introduction	51
6.2.	Phase I Decisions	52
6.2.1.	EdF/Louis Dreyfus	52
6.2.2.	EnBW/EDP/Cajastur/Hidrocantábrico	54
6.2.3.	Neste/IVO	58
6.3.	Phase II Decisions	59
6.3.1.	VEBA/VIAG	59

6.3.2.	EdF/EnBW	61
6.3.3.	EnBW/ENI/GVS	64
6.3.4.	Verbund/Energie Allianz	66
7.	Assessment	67

4. WIND ENERGY AND THE CONTEXT OF EU STATE AID LAW

MELVIN KÖNINGS	73
1. Introduction	73
2. What is EU State Aid Policy?	73
2.1. Introduction	73
2.2. Scope of EU State Aid Policy	74
2.3. State Aid Exemptions	76
2.4. Notification Procedure	77
3. The Case At Hand: Offshore Wind Park Q7	77
3.1. Wind Park Q7	77
3.2. Amount and Instrument of the Aid	78
3.3. Additional Support Instruments	78
3.3.1. Investment Support: the EIA Scheme	78
3.3.2. Operating Aid: MEP Scheme	79
3.3.3. Operating Aid: Tax Reduction on Regulatory Energy Tax (REB)	81
3.4. Existence of State Aid within the Meaning of Article 87(1) ECT	82
3.5. Compliance with the Environmental Guidelines	83
3.6. Calculating the Eligible Costs: What Cost Variables should be taken into Account?	83
3.7. Taking into Account Other Public Investment Support	86
3.8. Calculation of the Eligible Costs: the Result	87
3.9. Application of the Environmental Guidelines on the Operating Aid	87
4. Conclusion	89

PART II. THE DEVELOPMENT OF OFFSHORE WIND ENERGY IN THE NORTH SEA AREA

1. INTRODUCTION	
MARTHA M. ROGGENKAMP	93
1. Reasons for Developing Offshore Wind Energy	93
2. The Legal Framework for Developing Offshore Wind Farms	94

3.	The Legal Regime Regarding the Establishment of Offshore Wind Farms in the North Sea	96
----	---	----

2. THE REGULATION OF OFFSHORE WIND FARMS IN THE NETHERLANDS

	MARTHA M. ROGGENKAMP	99
1.	Introduction	99
2.	Wind Energy in the Netherlands	99
2.1.	Dutch Wind Energy Policy	99
2.2.	The Electricity Act	102
2.2.1.	The Liberalisation of the Electricity Sector	102
2.2.2.	The Promotion of “Green” Electricity	102
2.2.3.	Connection to the Electricity Grid	103
3.	Wind Energy Offshore	104
3.1.	Introduction	104
3.2.	The Legal Basis for Developing Offshore Wind Energy	105
3.3.	The Production of Wind Energy in the Territorial Sea ..	106
3.3.1.	Introduction	106
3.3.2.	Designating the Location for the Establishment of the Near Shore Wind Park	106
3.3.3.	Policy Rules applying to the Near Shore Wind Park	107
3.4.	Legal and Procedural Regime for Developing Wind Energy in the EEZ	108
3.4.1.	Establishing Wind Turbines and Electricity Cables in the EEZ	108
3.4.2.	The Wbr licence	109
3.4.3.	A Pre-Licensing Regime	111
3.4.4.	Financial and Fiscal Regime	113
3.4.5.	The Supply of Electricity from Offshore Wind Parks ...	114
4.	Concluding Remarks	115

3. CHANGES IN UNITED KINGDOM ENERGY POLICY: Stimulus for Significant Long-Term Growth in the United Kingdom’s Offshore Wind Generation?

	ANDREW NEWBERY AND JONATHAN EVANS	117
1.	Introduction	117
2.	Broad Overview of the UK’s Policy Stimulating the Use of Renewable Energy	118
3.	The Legal and Regulatory Framework for Offshore Wind	120

3.1.	Developing Wind Farms Offshore	120
3.1.1.	Territorial Sea	121
3.1.2.	Outside the Territorial Sea	121
3.2.	The Planned Primary Legislation for Offshore Renewable Energy	121
3.2.1.	The Role of UNCLOS	121
3.2.2.	Licensing Regime in Respect of Generation, Transmission and Distribution	123
3.2.3.	Consents for Offshore Renewable Energy Installations ..	123
3.2.4.	The Role of Local Planning Authorities	124
3.2.5.	Power to Extinguish Rights of Navigation	124
3.2.6.	Compliance with EU Directives relating to the Environment	124
3.2.7.	Decommissioning	125
3.2.8.	Safety Zones	126
3.3.	Planning Permission and Consent – Experience to Date	127
3.4.	The Planning and Compulsory Purchase Bill	128
3.5.	Connection of Offshore Wind Farms to the Grid	128
3.6.	Grid Reinforcement	129
4.	Recent Technical Developments in Relation to the Development and Installation of Offshore Wind Turbines	129
5.	The Current Status of the UK's Electricity Market	130
6.	Tentative Conclusions About How Quickly Offshore Wind Farms are likely to develop around the United Kingdom	131
 4. OFFSHORE WIND FARMS IN DENMARK		
	JENS BENGTTSSON	135
1.	General Background to the Development of Wind Power in Denmark	135
1.1.	Some Figures	135
1.2.	Incentives to promote the Development of Wind Energy	135
2.	Development of Offshore Wind Farms	136
2.1.	Offshore Jurisdiction	136
2.2.	The Action Plan of 1997	137
2.3.	Existing Offshore Wind Parks	138
2.4.	Future Parks	139
3.	The Legal Framework	139
4.	The Expected Tendering Procedure	142

4.1.	Rounds of Tenders	142
4.2.	Award Criteria	142
4.3.	Environmental Considerations	142
4.4.	Other Considerations	143
4.5.	Proposed Time-Horizon for Developing Offshore Wind Farms through Tendering	143
5.	Summary and Conclusion	144
 5. REGULATING OFFSHORE WIND FARMS IN GERMANY		
	GUNTHER KÜHNE	147
1.	Introduction	147
2.	Promoting Wind Energy	147
2.1.	German Wind Energy Policy	147
2.2.	Offshore Wind Energy Policy	148
3.	The Legal Framework	150
3.1.	Jurisdiction	150
3.2.	Economic Conditions	151
3.2.1.	Subsidisation Regime	151
3.2.2.	European and German Case law	152
3.3.	Problem Areas of Licensing	153
3.3.1.	Licensing in the Exclusive Economic Zone (EEZ)	153
3.3.2.	Licensing in Territorial Waters	157
4.	Conclusions and Outlook	158
 6. ESTABLISHING OFFSHORE WIND FARMS IN BELGIUM: HEADLINES AND BOTTLENECKS		
	BARTELD SCHUTYSER	161
1.	Introduction	161
2.	The Legal Instruments used by the Belgian Legislator ..	163
3.	The Award of a Concession	164
3.1.	The Tendering Procedure	164
3.2.	The Choice of the Concessionaire	167
4.	The Granting of Enviromental and Building Permits for the Establishment and Operation of Wind Parks ...	168
4.1.	The General Principles of the Marine Environment Law	168
4.2.	The Procedure for the Obtainment of Environmental and Building Permits	169
4.3.	The Environmental Impact Assessment	171
5.	The Formal Linkage Between the Domain Concession and the Environmental Or Building Permit	171

6.	The Granting of Licences for the Establishment and Operation of Cables	171
7.	Conclusion	172
PART III. SECURING ELECTRICITY SUPPLY		175
1. INTRODUCTION		
	ULF HAMMER	177
1.	Different Aspects of Security of Supply	177
2.	The Following Chapters	179
2. SECURITY OF LONG TERM SUPPLY: Developments in the Norwegian Electricity Sector		
	ULF HAMMER	181
1.	Introduction	181
1.1.	From Planning System to Market System	181
1.2.	Security of Supply in the Hydropower System	182
1.3.	The Following Sections	183
2.	The Electricity Markets	184
2.1.	Economic Theory	184
2.2.	The Spot Market	185
2.3.	The Balancing and Reserve Markets	187
2.4.	The Financial Electricity Markets	188
2.5.	The Resource Markets	190
2.5.1.	Introduction	190
2.5.2.	The Market for Acquisition of Waterfalls	190
2.5.3.	The Market for Acquisition of Companies (Ownership of Water Falls)	191
2.5.4.	The Ministry of Petroleum and Energy's Proposal	192
3.	The Network Monopoly	194
3.1.	Introduction	194
3.2.	Investment Duties	195
3.2.1.	Direct Duties	195
3.2.2.	Indirect Duties	195
3.3.	The Network Company's Income	196
3.3.1.	Regulatory Models	196
3.3.2.	The Income Frame	197
4.	Interconnections with Other Power Systems	199
4.1.	Introduction	199
4.2.	The Monopoly Model	200

4.3.	The Market Model	201
4.4.	The Merchant Model	202
5.	Conclusions	202

2. SECURITY OF LONG TERM SUPPLY: Developments in the Spanish Generation Market

IÑIGO DEL GUAYO	205
-----------------------	-----

1.	Background	205
1.1.	Energy and Electricity Sources	205
1.2.	Historical Overview of Electricity Security Concerns	205
1.3.	Liberalisation and Privatisation	206
1.4.	Privatisation, Golden Shares and Continuity of Electricity Supply	207
2.	Security of Electricity Supply	208
2.1.	The Role of the Government	208
2.2.	The Role of the Transmission System Operator	209
2.3.	Electricity Supply in Practice	211
3.	Promotion of Indigenous Resources and, Particularly, of Renewable Energy, as a means of increasing Security	212
4.	Security of Electricity Supply and Autonomous Communities	213
5.	Merger of Electricity and Gas Companies, Regularity and Continuity of Supply	213
6.	Electricity Planning	214
6.1.	Legal Provisions	214
6.2.	Electricity Blackouts in 2001-2003, Energy Planning and Investments	215
6.3.	The Energy Infrastructure Plan 2002-2011	216
7.	Security of Supply and International Interconnections .	218
8.	The Way Forward	219

3. ELECTRICITY MARKET LIBERALISATION AND SUPPLIER OF LAST RESORT IN BELGIUM

TIM VERMEIR	221
-------------------	-----

1.	Belgium is A Federal State	221
2.	Regional Legislation	221
2.1.	Historical Background	221
2.2.	The Regulatory Regime in Flanders	223
2.2.1.	Current Situation	223
2.2.2.	Default Supplier	225

2.2.3.	Supplier of Last Resort	226
2.3.	The Regulatory Regime in the Walloon Region	227
2.3.1.	Current Situation	227
2.3.2.	Default Supplier	227
2.3.3.	Supplier of Last Resort towards Customers with Financial Difficulties	227
2.4.	Competition Aspects of the Supplier of Last Resort / Default Supplier	228
3.	Federal Electricity Market	231
3.1.	Historical Background	231
3.2.	Supplier of Last Resort / Default Supplier	231
4.	Conclusion	232

4. SECURING DUTCH ELECTRICITY SUPPLY: TOWARDS A SUPPLIER OF LAST RESORT?

	HAMILCAR P.A. KNOPS	235
1.	Introduction	235
2.	The Contracts	236
2.1.	Eligible Customers	236
2.2.	Captive Customers	240
2.3.	The Problem	242
3.	The Current Situation: the Case of Energyxs	243
3.1.	Failure of a Supplier and/or Programme Responsible Party	243
3.2.	Programme Responsibility	246
3.2.1.	Programme Responsibility in More Detail	246
3.2.2.	Back-up Programme Responsible Party	247
3.3.	Supply	248
3.4.	EnergyXS: the Lights stayed on, but an Unclear Situation	249
4.	Do We need to arrange Anything?	252
4.1.	Directive 2003/54/EC: Universal Service	253
4.2.	To Disconnect or Not To Disconnect?	254
4.3.	Supplier and Programme Responsible Party of Last Resort	256
5.	The Measure	257
5.1.	The Legal Basis	257
5.2.	Boundary Conditions	259
5.3.	A Programme Responsible Party of Last Resort	260
5.3.1.	General Approach	260
5.3.2.	The Candidates	261
5.3.3.	The Selection Procedure: Who selects?	261

5.3.4.	The Selection Procedure: What Criteria?	262
5.3.5.	The (Contractual) Relationship with the Customer	263
5.4.	Supplier of Last Resort	264
5.4.1.	General Approach	264
5.4.2.	Failure of a Supplier	265
5.4.3.	The Candidates	266
5.4.4.	The Selection Procedure	267
5.4.5.	The (Contractual) Relationship with the Customer	270
5.5.	A Preferred Measure?	271
6.	Conclusion	272

5. SECURITY WITHOUT REGULATORS, LICENCES OR OBLIGATIONS: THE CASE OF NEW ZEALAND

BARRY BARTON	275
--------------	-----

1.	Introduction	275
2.	Energy Policy	276
3.	Electricity Policy	277
4.	Institutions of Industry Self-Regulation	280
5.	Generation	282
6.	Transmission	282
7.	Distribution and Supply	283
8.	Demand-side Management	285
9.	Risk of Dry Winters	286
9.1.	The Dry Winter of 2001	286
9.2.	Risk of a Dry Winter in 2003	287
10.	Conclusion	288
	Postscript	289

PART IV. UNDERGROUND (GAS) STORAGE 291

1. INTRODUCTION

MARC J.J. VAN BEUGE AND MARTHA M. ROGGENKAMP	293
--	-----

1.	Introduction	293
2.	Storage Facilities and Storage Purposes	293
2.1.	Categories of Storage Facilities	293
2.2.	Reasons for UGS	295
3.	Underground Gas Storage in Europe	295
4.	Some Basic Physics	297
4.1.	General Features of Underground Storage	297
4.2.	Transmissions and Storage	298
5.	The Legal Issues	298

2. GAS LIBERALISATION AND UNDERGROUND STORAGE:	
Developments in the United Kingdom	
CHARLES BANKES	301
1. Introduction	301
1.1. Background	301
1.2. Security of Supply	301
1.3. GB Storage Facilities	302
1.4. Rough	303
2. The Ownership of Rough and Hornsea	303
3. UK Regulation of Gas Storage	304
3.1. The Regulatory Regime	304
3.2. The 1998 Review of Gas Storage	305
3.3. Commitments Relating to Rough and Hornsea following Sale by BG to Dynegy etc.	307
4. The Acquisition of Rough by Centrica	307
4.1. Introduction	307
4.2. Market definition – Flexibility	308
4.3. Other Markets	309
5. Issues Considered by the Competition Commission	310
5.1. Manipulation of Centrica’s Sources of Flexibility in order to Raise Gas Prices	310
5.2. Centrica’s Ability and Incentive to Discriminate be- tween Customers in the Provision of Storage Capacity ..	310
5.3. Centrica’s Access to Information concerning Rough	311
5.4. The Withholding of Information about Rough from the Market	311
5.5. Centrica’s Lack of Incentive to Innovate in the Marketing of Rough Products	311
5.6. Centrica’s lack of Incentive to Invest in Increasing Rough Capacity	311
5.7. Increase of Risks and Uncertainties faced by Centrica’s Competitors and Potential Entrants	312
6. The Competition Commission’s Proposed Remedies	312
7. Conclusion	313
3. UNDERGROUND GAS STORAGE: Recent Developments	
in Italian Energy Law	
LUCA FRANCESCHINI	315
1. Introduction	315
2. Storage of Natural Gas From 1974 to 2000	316
2.1. Storage Activity Regime	316

2.2.	Relationship between Storage Concession and Production Concession	317
2.3.	Duration of Storage Concessions	317
2.4.	Access to the Storage System	317
3.	Storage Activity After Legislative Decree No. 164/2000 .	318
3.1.	Regime of Storage Activity	318
3.2.	Organisational and Structural Changes in Natural Gas Industry	319
3.3.	Relationship between Storage Concession and Production Concession	319
3.4.	The Award of Storage Concessions	319
4.	Storage Services and Right of Access Under Ld No. 164/2000	320
4.1.	Regulated Services	320
4.2.	Access to Storage System	321
4.3.	“Storage Code”	322
5.	Storage As A Regulated Activity	322
5.1.	Tariffs for Regulated Storage Services	323
5.2.	Negotiated Storage Services	324
6.	Completion of the Legislative Framework	324
	Appendix	326
4.	UNDERGROUND GAS STORAGE IN THE NETHERLANDS	
	MARC J.J. VAN BEUGE	331
1.	Introduction	331
2.	Underground Storage Under the Mining Legislation ...	332
2.1.	Underground Storage under the Old Mining Acts (“Mijnwetten”)	333
2.2.	Underground Storage under the New Mining Act (“Mijnbouwwet”)	335
2.2.1.	Storage of Substances	335
2.2.2.	Ownership of Natural Gas	336
2.2.3.	Storage Licences	337
3.	Storage in A Liberalised Gas Market	339
3.1.	Market Liberalisation and Flexibility	339
3.2.	The Gas Act	341
3.2.1.	Introduction	341
3.2.2.	Underground Gas Storage: Definitions	341
3.2.3.	General Provisions	342
3.2.4.	Storage: Third Party Access	342
3.2.5.	Controversial Issues	344
3.3.	Gas Storage Guidelines 2003	346

3.4.	Third Party Access to Underground Gas Storage in Practice	348
4.	New Developments in Underground Storage	350
4.1.	New Developments in Gas Storage	350
4.2.	Underground Storage of CO ₂	351
4.2.1.	Research Projects	351
4.2.2.	Legal Aspects	352
5.	Conclusion	353

5. MECHANISMS AND INCENTIVES TO PROMOTE THE USE AND STORAGE OF CO₂ IN THE NORTH SEA

CARL-W. HUSTAD AND J. MICHAEL AUSTELL	355
---	-----

1.	Introduction	355
2.	A Brief Historical Perspective on CO ₂ for EOR	356
2.1.	Past Experience from the United States	356
2.2.	Tax Incentives for EOR projects using CO ₂ in the United States	360
3.	A Perspective on CO ₂ for the North Sea	361
3.1.	Declining North Sea Oil Production	362
3.2.	Security of European Energy Supplies	367
3.3.	Climate-Change and GHG-Emissions	369
4.	The Role of Commercial Participants	371
5.	The Role of Government and Fiscal Mechanisms	373
6.	Conclusion	377
