### Business Architecture

The  
*TOGAF*®  
Standard — *10<sup>th</sup> Edition*

The TOGAF® Standard, 10<sup>th</sup> Edition  
Business Architecture

# **The Open Group Publications available from Van Haren Publishing**

## **The TOGAF® Standard, 10<sup>th</sup> Edition:**

Introduction and Core Concepts  
Architecture Development Method  
Content, Capability, and Governance  
Leader's Guide  
ADM Practitioners' Guide  
Business Architecture  
Enterprise Agility and Digital Transformation  
A Pocket Guide

## **The TOGAF Series:**

The TOGAF® Standard, Version 9.2  
The TOGAF® Standard, Version 9.2 – A Pocket Guide  
TOGAF® 9 Foundation Study Guide, 4th Edition  
TOGAF® 9 Certified Study Guide, 4th Edition  
TOGAF® Business Architecture Level 1 Study Guide

## **The Open Group Series:**

The IT4IT™ Reference Architecture, Version 2.1  
IT4IT™ for Managing the Business of IT – A Management Guide  
IT4IT™ Foundation Study Guide, 2nd Edition  
The IT4IT™ Reference Architecture, Version 2.1 – A Pocket Guide  
Cloud Computing for Business – The Open Group Guide  
ArchiMate® 3.1 Specification – A Pocket Guide  
ArchiMate® 3.1 Specification  
The Digital Practitioner Pocket Guide  
The Digital Practitioner Foundation Study Guide  
Open Agile Architecture™ – A Standard of The Open Group

## **The Open Group Press:**

The Turning Point: A Novel about Agile Architects Building a Digital Foundation  
Managing Digital

## **The Open Group Security Series:**

O-TTPS – A Management Guide  
Open Information Security Management Maturity Model (O-ISM3)  
Open Enterprise Security Architecture (O-ESA)  
Risk Management – The Open Group Guide  
The Open FAIR™ Body of Knowledge – A Pocket Guide

# Contents

|  |    |
|--|----|
| PART 1: Business Models .....  | 1  |
| 1 Introduction .....   | 3  |
| 1.1 Overview .....   | 3  |
| 1.2 Objectives .....   | 4  |
| 2 What is a Business Model? .....  | 5  |
| 3 The Impact and Benefit of Business Models .....                                  | 9  |
| 4 The Relationship between Business Models and Business Architecture .....         | 11 |
| 5 Using Business Models in the TOGAF Standard .....                                | 13 |
| 6 A Structured Approach for Business Model Innovation .....                        | 15 |
| 7 Example of a Business Model Framework .....                                      | 17 |
| 8 Conclusion .....   | 21 |
| A Overview of the Business Model Canvas .....                                      | 23 |
| PART 2: Business Capabilities, Version 2 .....                                     | 25 |
| 9 Introduction .....   | 27 |
| 10 What is a Business Capability? .....  | 29 |
| 10.1 Defining a Business Capability .....  | 29 |
| 10.1.1 Naming Convention .....   | 29 |
| 10.1.2 Description .....   | 30 |
| 10.2 Elements to Implement Business Capabilities .....                             | 30 |
| 10.2.1 People .....  | 30 |
| 10.2.2 Processes .....   | 30 |
| 10.2.3 Information .....   | 31 |
| 10.2.4 Resources .....   | 31 |
| 11 Business Capability Mapping .....   | 33 |
| 11.1 Approach .....  | 33 |
| 11.1.1 Organizational Structure .....  | 34 |
| 11.1.2 Business Model .....  | 37 |
| 11.1.3 Strategic Plans, Business Plans, and Financial Plans .....                  | 37 |
| 11.2 Structuring the Business Capability Map .....                                 | 37 |
| 11.2.1 Business Capability Stratification .....                                    | 37 |
| 11.2.2 Leveling .....  | 38 |
| 12 The Impact and Benefits of Business Capability Mapping .....                    | 41 |
| 13 Mapping Business Capabilities to Other Business Architecture Perspectives ..... | 43 |
| 13.1 Heat Mapping .....  | 43 |
| 13.2 Relationship Mapping .....  | 44 |
| 13.2.1 Capability/Organization Mapping .....                                       | 45 |
| 13.2.2 Capability/Value Stream Mapping .....                                       | 45 |
| 13.2.3 Capability/Business Process Mapping .....                                   | 46 |
| 14 Using Business Capability Maps with the TOGAF Standard .....                    | 47 |

|                                    |  |     |
|------------------------------------|--|-----|
| 15                                 | Conclusion .....   | 49  |
| PART 3: Value Streams .....        |  | 51  |
| 16                                 | Introduction .....   | 53  |
| 16.1                               | What is “Value”? .....   | 53  |
| 16.2                               | Approaches to Value Analysis .....   | 53  |
| 16.3                               | Value Streams in Business Architecture .....   | 54  |
| 16.4                               | Relationship of Value Streams to Other Business Architecture<br>Concepts .....           | 54  |
| 16.5                               | Benefits of Value Streams and Value Stream Mapping .....                                 | 55  |
| 17                                 | Value Stream Description, Decomposition, and Mapping .....                               | 57  |
| 17.1                               | Describing a Value Stream .....  | 57  |
| 17.2                               | Decomposing a Value Stream .....   | 57  |
| 17.3                               | Mapping Capabilities to Value Stream Stages .....  | 58  |
| 18                                 | Approach to Creating Value Streams .....   | 59  |
| 18.1                               | Guiding Principles .....   | 59  |
| 19                                 | Value Stream Mapping Scenarios .....   | 61  |
| 19.1                               | Baseline Example .....   | 61  |
| 19.2                               | Mapping Value Streams to Business Capabilities .....                                     | 62  |
| 19.3                               | Heat Mapping Scenario .....  | 65  |
| 20                                 | Conclusion .....   | 67  |
| B                                  | Comparison of Alternative Value Analysis Techniques .....                                | 69  |
| B.1                                | Value Chain .....  | 69  |
| B.2                                | Value Network .....  | 70  |
| B.3                                | Lean Value Stream .....  | 70  |
| PART 4: Information Mapping .....  |  | 73  |
| 21                                 | Introduction .....   | 75  |
| 22                                 | What is an Information Map? .....  | 77  |
| 23                                 | The Impact and Benefits .....  | 79  |
| 24                                 | The Relationship to Business Capabilities, Value Streams, and<br>Organization Maps ..... | 81  |
| 25                                 | Distinguishing between Information Maps and Data Models .....                            | 83  |
| 26                                 | Using Information Maps with the TOGAF ADM .....  | 85  |
| 27                                 | Putting Information Maps into Practice .....   | 87  |
| 28                                 | Conclusion .....   | 89  |
| C                                  | Representations of Information Maps .....  | 91  |
| C.1                                | ArchiMate Language Example .....   | 91  |
| C.2                                | Unified Modeling Language (UML) .....  | 93  |
| C.3                                | Entity Relationship Diagrams (ERDs) .....  | 95  |
| PART 5: Organization Mapping ..... |  | 97  |
| 29                                 | Introduction .....   | 99  |
| 30                                 | What is an Organization Map? .....   | 101 |
| 31                                 | Differentiating between Organization Maps and Organization Charts .....                  | 103 |
| 32                                 | The Impact and Benefits of Organization Mapping .....                                    | 107 |

|                                 |   |     |
|---------------------------------|---|-----|
| 33                              | The Relationship to Business Capabilities, Value Streams, and Information Maps..... | 109 |
| 34                              | Using Organization Maps with the TOGAF Standard.....                                | 111 |
| 35                              | Putting Organization Maps into Practice .....                                       | 113 |
| 36                              | Conclusion .....  | 115 |
| PART 6: Business Scenarios..... |   | 117 |
| 37                              | Introduction.....   | 119 |
| 38                              | Benefits of Business Scenarios .....  | 123 |
| 39                              | Creating the Business Scenario.....   | 125 |
| 39.1                            | The Overall Process.....  | 125 |
| 39.2                            | Steps.....  | 127 |
| 39.2.1                          | Planning Step.....  | 127 |
| 39.2.2                          | Gathering Step.....   | 127 |
| 39.2.3                          | Analyzing Step .....  | 129 |
| 39.2.4                          | Documenting Step.....   | 130 |
| 39.2.5                          | Reviewing Step.....   | 130 |
| 39.3                            | Phases .....  | 131 |
| 39.3.1                          | Premise Formulation Phase .....   | 131 |
| 39.3.2                          | Initial Verification Phase.....   | 132 |
| 39.3.3                          | Refinement Phase.....   | 132 |
| 40                              | Contents of a Business Scenario .....   | 135 |
| 41                              | Contributions to the Business Scenario.....   | 137 |
| 42                              | Business Scenarios and the TOGAF ADM.....   | 139 |
| 43                              | Developing Business Scenarios .....   | 141 |
| 43.1                            | General Guidelines .....  | 141 |
| 43.2                            | Questions to Ask for Each Area.....   | 141 |
| 43.2.1                          | Identifying, Documenting, and Ranking the Problem.....                              | 141 |
| 43.2.2                          | Identifying the Business and Technical Environment and Documenting in Models .....  | 142 |
| 43.2.3                          | Identifying and Documenting Objectives.....   | 142 |
| 43.2.4                          | Identifying Human Actors and their Place in the Business Model .....                | 142 |
| 43.2.5                          | Identifying Computer Actors and their Place in the Technology Model .....           | 143 |
| 43.2.6                          | Documenting Roles, Responsibilities, Measures of Success, and Required Scripts..... | 143 |
| 43.2.7                          | Checking for Fitness-for-Purpose and Refining, if Necessary .....                   | 143 |
| 44                              | Business Scenario Documentation.....  | 145 |
| 44.1                            | Textual Documentation.....  | 145 |
| 44.2                            | Business Scenario Models .....  | 145 |
| 45                              | Guidelines on Goals and Objectives .....  | 147 |
| 45.1                            | The Importance of Goals .....   | 147 |
| 45.2                            | The Importance of SMART Objectives.....   | 147 |
| 45.2.1                          | Example of Making Objectives SMART .....  | 147 |
| 45.3                            | Categories of Goals and Objectives.....   | 148 |

|         |   |     |
|---------|---|-----|
| 45.3.1  | Goal: Improve Business Process Performance.....       | 149 |
| 45.3.2  | Goal: Decrease Costs.....                             | 149 |
| 45.3.3  | Goal: Improve Business Operations.....                | 149 |
| 45.3.4  | Goal: Improve Management Efficacy.....                | 149 |
| 45.3.5  | Goal: Reduce Risk.....                                | 149 |
| 45.3.6  | Goal: Improve Effectiveness of IT Organization.....   | 150 |
| 45.3.7  | Goal: Improve User Productivity.....                  | 150 |
| 45.3.8  | Goal: Improve Portability and Scalability.....        | 150 |
| 45.3.9  | Goal: Improve Interoperability.....                   | 151 |
| 45.3.10 | Goal: Increase Vendor Independence.....               | 151 |
| 45.3.11 | Goal: Reduce Lifecycle Costs.....                     | 151 |
| 45.3.12 | Goal: Improve Security.....                           | 152 |
| 45.3.13 | Goal: Improve Manageability.....                      | 152 |
| 46      | Roles.....  | 153 |
| 47      | Checklists.....                                       | 155 |
| 47.1    | Checklist – Premise Formulation.....                  | 155 |
| 47.2    | Checklist – Plan.....                                 | 155 |
| 47.3    | Checklist – Gather.....                               | 156 |
| 47.4    | Checklist – Analyze.....                              | 157 |
| 47.5    | Checklist – Document.....                             | 157 |
| 47.6    | Checklist – Review.....                               | 158 |
| 48      | Techniques and Tips.....                              | 159 |
| 48.1    | On Active and Reflective Listening.....               | 159 |
| 48.2    | On Brainstorming and Affinity Analysis.....           | 160 |
| 48.3    | Introduce your Neighbor.....                          | 160 |
| 48.4    | We Believe.....                                       | 160 |
| 48.5    | On Money or Credit Voting Prioritization.....         | 161 |
| 48.6    | On Multi-Voting and Rank Ordering Prioritization..... | 161 |
| 48.7    | On Role Play.....                                     | 161 |
| 48.8    | On Alternative Analysis and Decision Matrix.....      | 162 |
| 49      | Summary.....  | 163 |

# Preface

## The Open Group

The Open Group is a global consortium that enables the achievement of business objectives through technology standards. With more than 870 member organizations, we have a diverse membership that spans all sectors of the technology community – customers, systems and solutions suppliers, tool vendors, integrators and consultants, as well as academics and researchers.

The mission of The Open Group is to drive the creation of Boundaryless Information Flow™ achieved by:

- Working with customers to capture, understand, and address current and emerging requirements, establish policies, and share best practices
- Working with suppliers, consortia, and standards bodies to develop consensus and facilitate interoperability, to evolve and integrate specifications and open source technologies
- Offering a comprehensive set of services to enhance the operational efficiency of consortia
- Developing and operating the industry's premier certification service and encouraging procurement of certified products

Further information on The Open Group is available at [www.opengroup.org](http://www.opengroup.org).

The Open Group publishes a wide range of technical documentation, most of which is focused on development of Standards and Guides, but which also includes white papers, technical studies, certification and testing documentation, and business titles. Full details and a catalog are available at [www.opengroup.org/library](http://www.opengroup.org/library)

## The TOGAF® Standard, a Standard of The Open Group

The TOGAF Standard is a proven enterprise methodology and framework used by the world's leading organizations to improve business efficiency.

## This Document

This document is a compilation of TOGAF® Series Guides addressing Business Architecture. It has been developed and approved by The Open Group.

It consists of the following documents:

|   |  |
|---|--|
| TOGAF® Series Guide: Business Models                  | This document provides a basis for Enterprise Architects to understand and utilize business models, which describe the rationale of how an organization creates, delivers, and captures value. It covers the concept and purpose of business models and highlights the Business Model Canvas™ technique.   |
| TOGAF® Series Guide: Business Capabilities, Version 2 | This document answers key questions about what a business capability is, and how it is used to enhance business analysis and planning. It addresses how to provide the architect with a means to create a capability map and align it with other Business Architecture viewpoints in support of business planning processes.   |
| TOGAF® Series Guide: Value Streams                    | Value streams are one of the core elements of a Business Architecture. This document provides an architected approach to developing a business value model. It addresses how to identify, define, model, and map a value stream to other key components of an enterprise's Business Architecture.  |
| TOGAF® Series Guide: Information Mapping              | This document describes how to develop an Information Map that articulates, characterizes, and visually represents information that is critical to the business. It provides architects with a framework to help understand what information matters most to a business before developing or proposing solutions.  |
| TOGAF® Series Guide: Organization Mapping             | This document shows how organization mapping provides the organizational context to an Enterprise Architecture. While capability mapping exposes what a business does and value stream mapping exposes how it delivers value to specific stakeholders, the organization map identifies the business units or third parties that possess or use those capabilities, and which participate in the value streams. |
| TOGAF® Series Guide: Business Scenarios               | This document describes the Business Scenarios technique, which provides a mechanism to fully understand the requirements of information technology and align it with business needs. It shows how Business Scenarios can be used to develop resonating business requirements and how they support and enable the enterprise to achieve its business objectives.   |

More information is available, along with a number of tools, guides, and other resources, at [www.opengroup.org/architecture](http://www.opengroup.org/architecture).

### About the TOGAF® Series Guides

The TOGAF® Series Guides contain guidance on how to use the TOGAF Standard and how to adapt it to fulfill specific needs.

The TOGAF® Series Guides are expected to be the most rapidly developing part of the TOGAF Standard and are positioned as the guidance part of the standard. While the TOGAF Fundamental Content is expected to be long-lived and stable, guidance on the use of the TOGAF Standard can be industry, architectural style, purpose, and problem-specific. For example, the stakeholders, concerns, views, and supporting models required to support the transformation of an extended enterprise may be significantly different than those used to support the transition of an in-house IT environment to the cloud; both will use the Architecture Development Method (ADM), start with an Architecture Vision, and develop a Target Architecture on the way to an Implementation and Migration Plan. The TOGAF Fundamental Content remains the essential scaffolding across industry, domain, and style.

## Trademarks

ArchiMate, DirecNet, Making Standards Work, Open O logo, Open O and Check Certification logo, Platform 3.0, The Open Group, TOGAF, UNIX, UNIXWARE, and the Open Brand X logo are registered trademarks and Boundaryless Information Flow, Build with Integrity Buy with Confidence, Commercial Aviation Reference Architecture, Dependability Through Assuredness, Digital Practitioner Body of Knowledge, DPBoK, EMMM, FACE, the FACE logo, FHIM Profile Builder, the FHIM logo, FPB, Future Airborne Capability Environment, IT4IT, the IT4IT logo, O-AA, O-DEF, O-HERA, O-PAS, Open Agile Architecture, Open FAIR, Open Footprint, Open Process Automation, Open Subsurface Data Universe, Open Trusted Technology Provider, OSDU, Sensor Integration Simplified, SOSA, and the SOSA logo are trademarks of The Open Group.

A Guide to the Business Architecture Body of Knowledge, BIZBOK, Business Architecture Guild, CBA, and Certified Business Architect are registered trademarks of the Business Architecture Guild.

## Business Capabilities, Version 2

The Open Group gratefully acknowledges the contribution of the following individual in the development of this document:

- Frédéric Lé – DXC Technology

The Open Group gratefully acknowledges the authors of this document:

- Alec Blair – Alberta Health Services
- J. Bryan Lail – Raytheon
- Stephen Marshall – IBM

The Open Group gratefully acknowledges the contribution of the following individuals in the development of the first version of this document:

- Sonia Gonzalez – The Open Group
- Kirk Hansen – Metaplexity Associates
- Harry Hendrickx – HPE
- Rich Hillard – Project Editor, ISO/IEC/IEEE 42010
- Chalon Mullins – Business Architecture Guild
- Gerard Peters – Capgemini
- Jim Rhyne – Business Architecture Guild
- Pieter Steyn – Enterprise Architects

## **Value Streams**

The Open Group gratefully acknowledges the authors of this document:

- Alec Blair – Alberta Health Services
- J. Bryan Lail – Raytheon
- Stephen Marshall – IBM

The Open Group gratefully acknowledges the contribution of the following people in the development of this document:

- Chris Armstrong – Armstrong Process Group
- Mats Gejnevail – Combitech
- Sonia Gonzalez – The Open Group
- Harry Hendrickx – Hewlett Packard Enterprise
- Andrew Josey – The Open Group
- Gerard Peters – Capgemini
- Sarina Viljoen – Huawei

## **Information Mapping**

The Open Group gratefully acknowledges the contribution of the following people in the development of this document:

- The Authors: Steve DuPont, J. Bryan Lail, and Stephen Marshall
- Key Reviewers: Alec Blair, Mats Gejnevail, Chalon Mullins, William Ulrich
- Key Enablers: Sonia Gonzalez, Mike Lambert
- Reviewers: Samuel Biller, Dave Gilmour, Sonia Gonzalez, Andrew Josey

and also past and present members of The Open Group Architecture Forum.

## **Organization Mapping**

The Open Group gratefully acknowledges the authors of this document:

- Steve Dupont
- J. Bryan Lail
- Stephen Marshall

The Open Group gratefully acknowledges members of The Open Group Architecture Forum past and present for their contribution in the development of this document, including the following key enablers:

- Sonia Gonzalez

- Mike Lambert

### **Business Scenarios**

The Open Group gratefully acknowledges the authors – Terry Blevins and Mike Lambert – and also past and present members of The Open Group Architecture Forum for their contribution in the development of this document.

## *PART 1: Business Models*

Prepared by The Open Group Architecture Forum

# 1 Introduction

---

This TOGAF® Series Guide to Business Models provides a basis for Enterprise Architects to understand and utilize business models, which describe the rationale of how an organization creates, delivers, and captures value.<sup>1</sup> Business models provide a powerful construct to help focus and align an organization around its strategic vision and execution. In this Guide we cover different forms of business models and approaches to modeling, from the conceptual down to a practical example.

There is a direct relationship between the business innovation captured in these models and the approach to implementing that innovation through Enterprise Architecture. We explore that relation through Business Architecture methods such as value streams and business capabilities, then provide a specific example based on a generic retail company undertaking a Digital Transformation. An appendix delves deeper into the structure of one of the most commonly used business model frameworks for architects interested in working with business leaders to execute their strategy.

## 1.1 Overview

The world's top C-suite leaders know that the effective management and exploitation of information is a key factor for business success, and is critical to developing and maintaining competitive advantage. An Enterprise Architecture supports this objective by providing a strategic context for the evolution of technologies in response to the constantly changing needs of the business environment.

As stated in the TOGAF Standard – Introduction and Core Concepts, a key goal of Enterprise Architecture is to create or enable the alignment of the business operations with the overall business direction (vision and strategy). Furthermore:

*“... a good Enterprise Architecture enables you to achieve the right balance between business transformation and continuous operational efficiency. It allows individual business units to innovate safely in their pursuit of evolving business goals and competitive advantage. At the same time, the Enterprise Architecture enables the needs of the organization to be met with an integrated strategy which permits the closest possible synergies across the enterprise and beyond.”*

To achieve this alignment, the architect must develop a fundamental understanding of the core elements that make up a business and how they relate to the ways in which it creates, captures, and delivers value. However, it is not always clear what the business direction is, or how the business intends to create, capture, and deliver value to customers and stakeholders. If we don't fully understand what a business does or what it intends to do; why it exists; or how it works to produce something of value to stakeholders (while making money in the process), then how can architects devise an appropriate target-state environment that realizes the business objectives?

---
