Two quotes from an interview with Nikola Tesla in 1899

'According to mainstream science, the electromagnetic spectrum is 0.005% of what exists in the universe, in terms of energy and in other forms. But visible light, the only frequency band we can see, is only a tiny particle of that 0.005%. People are effectively blind to all that exists beyond what they can perceive.'

Recall that this was at a time when science could not even understand the atomic level of particles, let alone the subatomic levels, the field of Quantum Mechanics.

'The hardest part of getting people to think outside the box and believe in the impossible is getting them to understand that virtually EVERYTHING we are taught about the nature of light, energy and biology is a completely fabricated lie to keep humanity in the dark. And deliberately so!'
