The Architect of the Mind

There is a prevailing myth that the digital age will eventually render human thought obsolete—that algorithms will outpace our own cognitive machinery. At The Visual Smiths, we believe the opposite is true. The human brain remains the most sophisticated, adaptable, and resilient system in the known universe. But like any complex instrument, it requires calibration.
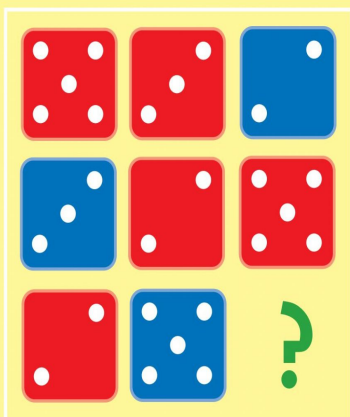

You hold in your hands a blueprint for that calibration. This is not merely a collection of problems; it is a gymnasium for your neurons. We have forged these mazes, crosswords, visual paradoxes, and logic grids to serve as a catalyst for your cognitive vitality. From the deductive precision required for our logic grids to the lateral thinking needed for our visual conundrums, every page is designed to keep your "thinker" in peak condition.

So, clear your workspace, sharpen your pencil, and prepare to forge a stronger mind.

— VisualSmith

Which of the four figures on the right completes the set?

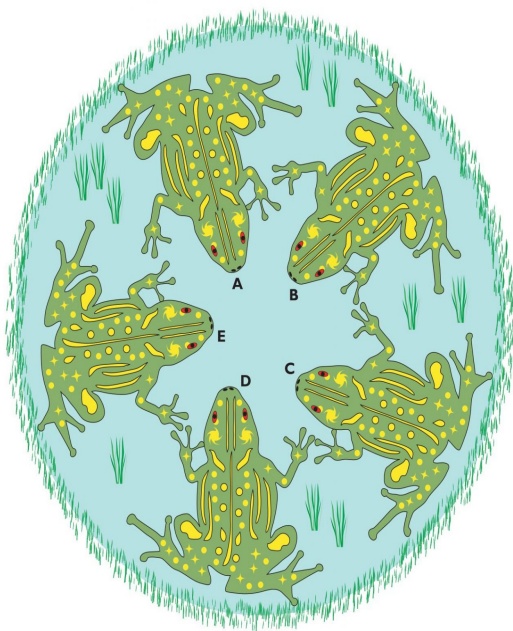

A       B       C       D

Can you spot which two frogs are identical?
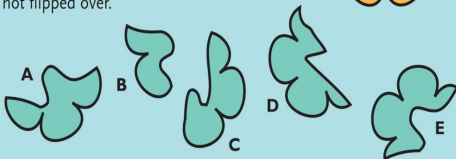

What shape should
be in the top brick?

✏️ -------------------------------------------

Which are the only two pieces that
will fit together perfectly to form
a green flower identical to this orange
flower? Pieces may be rotated, but
not flipped over.

✏️ -------------------------------------------

Which is the only shape to appear twice in the box below? Circle the pair.

Follow the unbroken path from one tower to another.

**7**

What word might appear in the missing space?

[ ]

BLUE   PINK

BROWN   BLACK   GREEN

YELLOW   PURPLE

SCARLET
