

# Table of Contents

<b>1</b>	<b>Introduction</b>	<b>7</b>
<b>2</b>	<b>Corrosion</b>	<b>10</b>
2.1	Chemical processes	10
2.2	Environmental factors	11
2.3	Zonation	14
2.4	Accelerated low water corrosion (ALWC)	15
<b>3</b>	<b>Biocorrosion: biofouling</b>	<b>17</b>
3.1	What is biocorrosion (microbial induced corrosion MIC)	17
3.2	Biofilms	19
3.3	Oxygen consumption	22
3.4	Nutrients	25
3.5	Acidity (pH)	27
3.6	Electron transfer	28
3.7	Anode-cathode reactions	31
3.8	Sulfate-reducing bacteria (SRB)	36
3.9	Tubercles	39
3.10	Sulfur-oxidizing bacteria	43
3.11	Direct electron uptake	44
3.12	Iron-reducing bacteria	49
3.13	Bacteria and nitrogen	51
<b>4</b>	<b>Corrosion control</b>	<b>52</b>
4.1	Corrosion management	52
4.2	Cathodic protection	54
4.3	Coatings	61
<b>5</b>	<b>Environment</b>	<b>62</b>
	<b>References</b>	<b>64</b>
	<b>Index</b>	<b>70</b>
